COODU TRUST
Annual Report - 2005-2006

Annual Report 2005-2006

It gives us great pleasure in presenting you with the Annual Report of Coodu Trust for the year 2005-2006.

We strengthened our presence and activities in 14 districts, 84 Blocks, 479 Village Panchayats through which we directly impacting the lives of 2816091 people of Tamil Nadu over the past 6 years. The year 2005-2006 was a year of significant changes and introspection for us at Coodu Trust and marks the beginning of a new era. We therefore present this annual report as a summary of our growth over the past few years(since 2000-2006).

The Watershed Development Programmes and our activities in creating and supporting women Self Help Groups have been the backbone of our activities in different districts. Our other activities have been in implementing Total sanitation Campaigns, Income Generation Programmes Health programmes, and support to Government agencies on their Research, Training, Information Technology and IEC design & production needs.

Coodu Trust has always been supporting the implementation of the Watershed Development Programmes by conducting PRA, mobilizing and organizing the community, Providing training and capacity building to different levels of implementers, appointing the Watershed Development Team members, other technical and managerial support, managing the development works and guiding the activities at the grassroots levels. The Watershed Development Team member employed by Coodu Trust on behalf of the Project Implementing Agencies (PIA) have now been transferred as direct contract employees of the PIAs. We however continue our support to the PIAs in different districts by guiding the watershed development programmes and taking up specific tasks.

During this year we are also entering in areas such as Entrepreneurship Development, Marketing Infrastructure and support for Agricultural, Horticultural, Forest and Cottage industry products including the products of Women Self Help Groups and small and marginal producers. We are also establishing Health services such as Counseling centers, Care & Support of People Living with HIV / AIDS and working on ways to reach Health care to the unreached.

Our Research and consultancy division is now a full service research agencies providing online research services, large scale survey research, PRA, Qualitative

COODU TRUST

Annual Report - 2005-2006

the training of care providers of People living with HIV/AIDS. Environment Sanitation training under Total Sanitation Campaign has been provided to panchayat level federation leaders and self help group animator representatives in 2 districts. We are now developing syllabus for training and certification programmes in a number of skill areas where formal training and certification does not exist at present.

Our Energy and Environment services division has enabled a private enterprise in solid waste management (SWM) that is now engaged in SWM services at Koyambedu Market Complex, Chennai. A major activity in future years would be Research studies and development of systems for delivery of Urban Environment Infrastructure Services (inc. water and SWM) and demonstration in Urban and Rural areas. We are also equipping ourselves to provide non-conventional energy products and services on a large scale using technologies including bio-mass gasification, bio-gas, wind energy, solar energy devices and energy from waste.

The Tsunami disaster in December 2004 made our teams involve in emergency relief efforts. We are now providing technical support to different voluntary groups who are directly involved in rehabilitation and disaster prevention and mitigation activities.

Having gained vast experience across the state in mobilizing and organizing communities in rural areas for Government initiated programmes, we have realized that while catch phrases such as 'community participation', 'bottom up' and 'stakeholder participation' are being liberally used, our development models, implementation and evaluation methods are essentially top-down. We have therefore been studying the success and failures of interesting Government, enterprise and organisational models of development including the Gandhian ideals, Panchayat Raj, cooperative movement and the recent attempts at privatization and private-public cooperation. We are increasingly convinced that any service or development effort must provide genuine ownership of the effort to the actual users the People at local levels. Therefore producers cooperatives have to partner with user cooperatives, PPP (Public Private-Partnership) model has to become PPPP (Public-Private-People-Partnerships) where the word 'Public' denotes the 'Government' and People denotes the local people who are the actual grassroots users of the services or development efforts. We have initiated efforts in further research and later demonstration of partnership efforts in a range of activities including, village level economic activities, urban infrastructure environmental services such as water supply and drainage, use of technology such as non-conventional energy. We hope to transform these initiatives into actual projects and programmes over the future years.

The following pages provide a detailed list of different activities undertaken at the block level in 14 districts (2002-2006), human resources and infrastructure, inventory of capabilities, Annual expenditure profile for 5 years (2000-2001, 2001-2002, 2002-2003, 2003-2004, 2004-2005 and 2005-2006), Sources of support and contact addresses.
