Annual Report 2015-16

From the Director's Desk

Coodu Trust started its activities ten years back with the vision of creating an egalitarian, self-reliant society by adopting latest and appropriate technologies sustained through participatory community efforts. Promotion of participatory development, gender equity and strengthening of Voluntary sector and Local Self Governance Institutions is our guiding mission.

Over the years, we offered a series of education supports to the target population including women, dalit and other marginalized people, adult educators, leaders of adult education institutions, CBOs/CSOs/NGOs, elected representatives and youth and children. The overall objective of the reporting years interventions was to enhance the knowledge and capacity of the participants to empower themselves to engage actively in the socio-economic development including poverty reduction.

The thrust given to skill development of rural community. Entrepreneurship development and support for income generation. No doubt the effects will lead to some visible impact in the life of the participants and their community. Coodu Trust is working as an apex body in the area of public health and family welfare at Karur district of Tamil Nadu. It aims to achieve the well-being and vitality of the rural people. Our organization has been addressing a wide range of issues on HIV/ AIDS, Mortuary van services to the rural poor, Public Health, Family counseling and Family Welfare Management by its multi-disciplinary functions in the form consultancy, education and training interventions.

Against the backdrop of the massive credit needs of rural development and the need to uplift the weaker sections in the rural areas, our voluntary agency helped in the micro credit and micro finance to the Self Help Group women at Karur district. A new arrangement is being made in the village level for achieving the desired focus and thrust towards integration of credit activities in the context of the strategy for Integrated Rural Development.

Skill development in agriculture and apparel sector was promoted with the assistance of NSDC.

I am really proud to present before my colleagues, co travelers; partners, resource providers and well-wishers a summary of our activities, its outcome and effects.

With regards,

S. Jagadeesan,
Director.

Vision

“Self Sufficient, Self Governed communities that thrive together as a collaborative economy where every activity is an enterprise and every enterprise is a Social Enterprise.”

Mission

- To support the delivery of all Government efforts as a Social Enterprise that maximizes the benefit to the society.
- To develop Social Enterprises as a sustainable model for Growth and Development.
- To use Technology and Science responsibly for development without ignoring conventional wisdom.
- To demonstrate Collaboration as a powerful way for communities to be strong and grow.
- To innovate and learn while sharing every learning and knowledge with the world.
- To help Communities that work collaboratively to become Self Sufficient on every need and develop Self Governance models for such communities
- To incubate and nurse ideas to growth in Agriculture, Industry, Enterprise and Governance.

Activities

Skill Training

The National Skill Development Corporation, (NSDC) is a one of its kind, Public Private Partnership in India, under the Ministry of Skill Development & Entrepreneurship. It aims to promote skill development by catalyzing creation of large, quality, for-profit vocational institutions. NSDC provides funding to build scalable, for-profit vocational training initiatives. Its mandate is also to enable support systems such as quality assurance, information systems and train the trainer academies either directly or through partnerships. NSDC acts as a catalyst in skill development by providing funding to enterprises, companies and organisations that provide skill training. It will also develop appropriate models to enhance, support and coordinate private sector initiatives. The differentiated focus for the 21 sectors under NSDC's purview and its understanding of their viability will make every sector attractive to private investment. The NSDC facilitates or catalyses initiatives that can potentially have a multiplier effect as opposed to being an actual operator in this space. In doing so, it strives to involve the industry in all aspects of skill development. They play three key roles viz., funding and incentivizing, enabling support services, shaping/creating etc. It do have a financing initiatives provide funding through loan, equity and grants. NSDC formed Sector Skill Councils to develop job roles for training, assessing, certifying & rewarding candidates with their affiliated Partners. The role of Training Partners is to identify and select the targeted beneficiaries to train and place them in their respective job roles. Once candidates clear the certification their reward will be distributed to their Aadhaar linked individual accounts.

We are a Training partner of NSDC. We found a vast skill gap in our region in dairy sector, which are extremely important for the livelihood of the native people. In this connection, we imparted skill training on dairy sector to 560 farm beneficiaries in Dindigul, Karur and Salem districts of Tamil Nadu. The training was conducted for two hundred hours and 30 persons per batch. Among 560 beneficiaries 461 obtained the certificates from NSDC, New Delhi.

Under apparel sector we organized skill training on Sewing machine operator to 1000 members along with the coordinating agencies.

Soft skill development among rural youths

Skill training on spoken English was imparted to 2000 rural youths of Dindigul, Karur and Salem districts.

Tree Planting

To reduce the carbon dioxide content of the air the easy effective climate resilient technology is to raise the tree cover in earth. The trees not only reduce the CO₂ content of the earth but also modify the microclimate favourably for the inhabitants of the earth. It is the need of the hour especially states like Tamil Nadu which experiences flood in one part and acute continuous drought. The

Number of the rainy days was reduced and also the total rainfall was even less than 50 % of the normal downpour.

Coodu Trust organized tree planting programmes in non conventional forest areas like roadside, community lands, temple lands, farm lands etc. We distributed tree seedlings for every individual who participate in the functions like marriage to encourage tree growing in each and every house. 30000 seedlings of various ornamental trees and timber trees were distributed.

Dove Trust, Britain donated 196.35 pounds to our trust and we started a small nursery from which we produced 500 seedlings and planted.

Farmer Producer Organisation (FPO)

The Government of India is now emphasizing on the promotion of FPOs for the benefit of small and marginal farmers from market exploitation. Through this they are armed to practice profitable agriculture and with the opportunity to market their products directly to the customers.

Awareness on the FPO, Formation and Management of FPOs and opportunities available for them through FPO by government agencies were taken up in 10 villages of 3 blocks of Dindigul district covering the farmers growing Maize, Cotton, Vegetables and Mango. About 600 farmers benefitted.

Thirty farmers were taken for an exposure visit to successful FPOs in Kannivadi and Palani of dindigul district.

Attracting and Retaining Youth in Agriculture

Migration to urban areas and also conversion of farm families to non -farm activities for their livelihoods really threatens the future of Indian agriculture. The youth especially in rural areas are not interested in agriculture and keen to shift to urban areas for alternate livelihood.

It is imperative to convert the agriculture for attracting the youth back to agriculture. Through various secondary sources and direct group discussions we identified that smart work demanding agriculture with high profitability can retain the youth in agriculture.

Keeping this in view we organized training programmes to popularize farm equipments and implements and technologies like drip/sprinkler irrigation system to make work easier. We also involved in group formation amongst the rural youth for empowering hem for distance markets.

We planned and charted technologies for everyday income (Dairy), anytime money through rearing goats/backyard, periodical earning through cultivation of crops and long duration high income through the cultivation of industrially important agro forestry trees.

Supplementary income was concentrated through Honey production, Mushroom Cultivation, Vermicomposting etc.

About 750 youths were benefitted through this activity hailing from 75 villages of 5 blocks of Dindigul and Karur districts.15 training cum awareness programmes were undertaken.

The other activities covered during the year are enlisted below

S.No.	Activities	Particulars
1	Khadhi and Village Industries Board	Training documentation was done covering 1000 Artisans in 10 districts of Tamil Nadu
2	Tamil Nadu Water and Drainage Board	Training on Gross Root Level Workers to Monitor water quality by Testing of water samples using FWTK & PRI/PWSS members on planning monitoring and managing PWSS for 500 members of Dindigul and Cuddalore Districts.
